

Environmental policy

Based on the international situation and objective environmental change, with the ever-changing belief that keeping the current status is out-of-date, and seize the day, and continuing introducing new technology, new concepts, the CHROMA ATE INC. has elevated the competitive advantage on the technology level.

In addition to conforming to the regulations concerning the environmental protection, promising the target of reducing the environmental impact due to the products, activity and the services, so as to create the situation of economy and environmental protection in Chroma, we promise:

Obey the law

Obtain, identify, obey and conform to the law and regulations that can be implemented in Chroma concerning the environmental impact due to the products, activities and services, as well as other required items, and conveying the related information to the employees.

Continuous improvement

Promote the environmental policy with pollution prevention as the goal, establish supervision and measurement methods to control operations and activities related to significant environmental considerations, and evaluate the effectiveness of the implementation of the environmental management system as the basis for performance evaluation to achieve continuous improvement.

Reduce the impact

To effectively control the environmental impact, the appropriate protective facilities, equipment or the SOP formulated for the activity and operation are provided, to prevent the environmental impact caused by hazardous substances, waste water, the management of the wastes, etc.

Consultation and communication

In order to strengthen the interaction with employees, the public, suppliers and stakeholders, establish channels for communicating environmental policies and related messages, and give appropriate responses.
